SEPTEMBER HEALTH SOLUTIONS

Implementing a pooled-testing routine in your school, business, organization or sports team can lead to better student outcomes, better mental health outcomes, increased sports performance and ultimately less fear and anxiety.

SEPTEMBER HEALTH
WANTS TO KNOW

WHAT IS YOUR GAME PLAN

To manage Covid this season?

The background of the entire image is a repeating pattern of yellow hexagons, resembling a honeycomb. A white rectangular box is centered on the page, containing the main text.

We Believe that **TESTING**
is the **WINNING STRATEGY**

Here's why:

WHO ARE WE?

- ✦ September Health believes there is never just one solution, or a one-size fits all strategy in a crisis.
- ✦ September Health was born out of a deep need for data-driven solutions to manage SARS-CoV2 the virus that causes Covid-19 within populations of people.
- ✦ September Health believes that there is no replacement for in-person learning.
- ✦ September Health believes that after-school activities like athletics, theater, art, music and more are critical for our children's academic, social and mental health.
- ✦ When children are in school, parents go back to work.

Testing is the SUPERIOR strategy

Pooled Covid-19 Testing is:

- ✦ A tool in the toolbox
- ✦ Non-invasive, no side effects, and totally safe
- ✦ All saliva-based, no swabs!
- ✦ A compliance manager or as Matt likes to say, "An insurance policy"
- ✦ Fully HIPPA compliant
- ✦ Find positive cases early (1-4 days ahead of infection)
- ✦ A pathway forward
- ✦ Can help your personnel make data-driven decisions
- ✦ Can help determine prevalence of infection
- ✦ Can lead towards going mask-less for kids
- ✦ Can lessen fear and anxiety for kids, students, parents and staff
- ✦ Can lead to better student outcomes
- ✦ Can lead to better mental health outcomes
- ✦ Can lead to better sports performances
- ✦ Can reduce anxiety and fear!

WHAT IS POOLED TESTING?

Pooled Testing is a strategy to manage Covid-19 within a group of people

- Pooled Testing using SalivaClear is completely non-invasive; no side effects, no needles, no swabs
- Pooled Testing combines up to 24 saliva samples into one sample for faster and much more economical PCR testing, as low as \$15 per student for school programs and just \$20 per adult for private business*
- Samples are pooled at the lab in Brooklyn, New York where the turnaround time upon receipt is within 24 hours.
- Pooled Testing is an on-going routine that can help prevent Covid outbreaks and find infection early (1-4 days ahead of time)
- Pooled Testing can help you to stay open and running because you are effectively managing Covid risk.

* Pricing for students is \$360 per pool of 24

* Pricing for adults or private businesses is \$480 per pool of 24

HOW IT WORKS

- Your Hive is your people, break into teams of 24
- Appoint your Queen Bee, who coordinates tests and results
- Drones are consenting parents and/or support to the Queen
- Honeybees get back to work
- September Health is your Customer Service

POOLED COVID-19 RT-PCR

Testing with SalivaClear Steps:

COLLECT

Collect a saliva sample for each person in the group. Samples are tested. If the results are negative, the group is clear

TEST

If the test from Stage 1 is positive, the group will be divided into smaller groups of two people each to locate the result.

ASSESS

The positive test group is retested as two individual tests to locate the COVID+ individual.

Mirumus clinical labs developed SalivaClear testing, handles testing as well as testing analysis. Coverified's software features a symptom checker, contact tracing, testing results integration, clearance gating, and analytics so you have all the data conveniently organized inside your portal making your experience simple and streamlined.

OUR PARTNERS

BEST IN CLASS PARTNERS

PARTNERED WITH
CoVerified & Mirimus

COVERIFIED:

- Owned and operated by leading Public Health experts
- Dedicated to keeping schools open and in-person
- Easy to use software includes; symptom tracker, contact tracing, results manager and more

MIRIMUS CLINICAL LABS:

- National leader and innovator in the pooled-testing space
- Dedicated to keeping schools open and in-person
- Lab is personal and high-touch, you can work directly with lab technicians
- Founded by a parent-scientist concerned about her children learning from home

BENEFITS OF POOLED TESTING

QUICK TURN AROUND

Turn around for results is within 24 hours of receipt at the lab

NON-INVASIVE

Saliva-based testing is non-invasive and requires no trained medical personnel

ONE PRICE

We charge one upfront price for all three stages of testing, no complicated billing

ONE TEST

We use just one saliva sample to perform all three stages of testing, no recollection is required

PEACE OF MIND

Students can presume they are negative until a positive pool is found, which can lead to improved mental health outcomes and better student outcomes

NO DISRUPTION

Ongoing, routine testing leads to less disruption in the classroom or sports team

WHO CAN USE POOLED TESTING?

Any organization that meets regularly to meet Covid-19 compliance

BUSINESSES,
ORGANIZATIONS
& EVENTS

SCHOOLS &
CAMPUSES

SPORTS &
AFTER-SCHOOL

FAITH BASED
OR CARE FACILITIES

WHO IS USING POOLED-TESTING?

- Wellesley Public Schools, Wellesley Massachusetts (case studies are available).
- NBA – implemented saliva-based testing after nasal swab fatigue and credited the testing protocol to a regular 2021 season.
- USA Rowing
- USA Boxing
- NFL – announced that all players, including vaccinated, will be tested every 7 days
- St. Johns Athletics / St. Johns Campus
- Almost all college campuses
- Many private schools in NJ
